

UNWIND 3D

We unwind non-conventional SOLUTIONS to develop and improve your PRODUCT by using our expertise and SERVICES.

SOLUTIONS

- ▶ Automated
- ▶ Scalable and Sustainable
- ▶ Cost - Effective

PRODUCTS

- ▶ Flexible Heated Fabrics
- ▶ Thermoplastic Composites
- ▶ Smart - Textile

SERVICES

- ▶ Engineering
- ▶ Additive Manufacturing
- ▶ Consultancy

THEMOPLASTIC COMPOSITE

We accelerate the use of thermoplastic composites from the sport and leisure to the automotive industries.

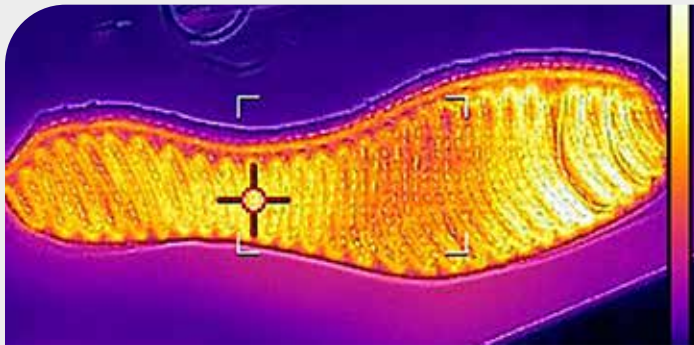

We think differently via Tailored Fibre Placement (TFP) technology

We offer high volume production of thermoplastic parts via dedicated molding technology.

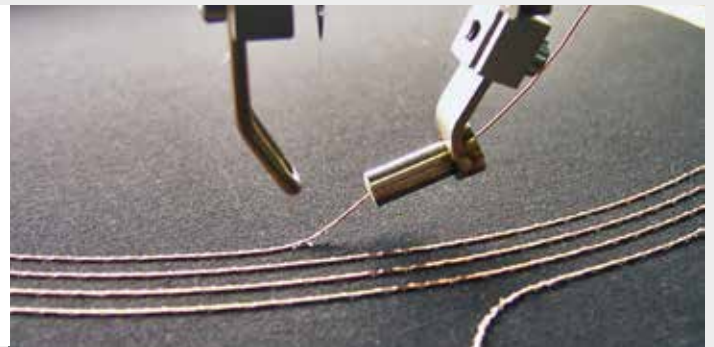

We shorten the manufacturing chain thanks to our suppliers and the use of innovative materials.

FLEXIBLE HEATED FABRICS

We allow the use of flexible heated fabrics in any industry, for any market and any application.

We benefit of the exclusive advantages and reliability of Tailored Wire Placement (TWP) technology.

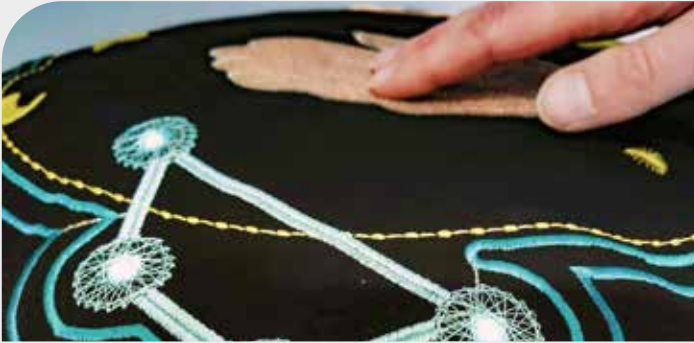

24/7 production thanks to the latest automated solutions of our machinery.

We work on your requested materials meeting your expectations and technical specifications.

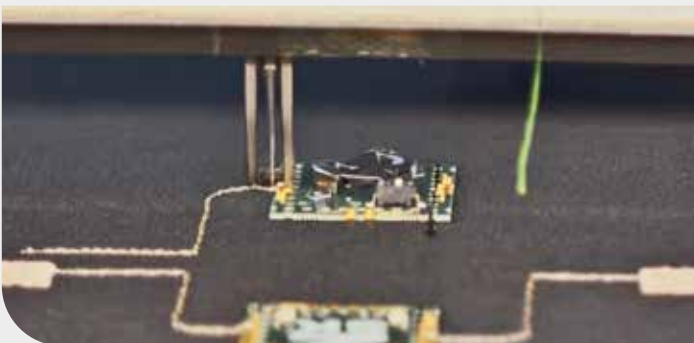

SMART TEXTILE

We bring your idea from concept to life, quickly and effectively thanks to our team of experts.

We strive for constant development and automation, unlocking e-textile mass production scenarios.

We provide you with the most recent and exclusive technical solutions thanks to our networking of partners.
